

## The Article

Bricklaying students who enrolled in Certificate II Pathways Course at Granville TAFE successfully completed a Compost Bay at the John Irving Park Community Garden in Jordan Street, Rosehill.

The students have attended the Certificate II Bricklaying Course since June this year, excavated and poured reinforced concrete footings, after which they constructed the brickwork and paved the four compartments.

The Bricklaying section at Granville TAFE is keen to form partnerships with Community organisations, whereby students are afforded the opportunity to use the skills and knowledge this course provides them in practical and productive projects, as the one above.

### **Granville TAFE welcomes any inquiries for similar projects.**
